## DETAILED ACTION

### ***Information Disclosure Statement***

The information disclosure statement filed 9/25/03 has been received and made of record in the application file wrapper. Note the acknowledged form PTO-1449 enclosed herewith.

### ***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101, which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-30 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-30 of prior U.S. Patent No. 10/672731. This is a double patenting rejection.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3743

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 26-29 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S.

Patent No. 6,570,050 ("Augustine et al.").

As regards claim 26, Augustine et al. disclose a bandage for autolytic wound debridement, which anticipates applicant's claimed invention. More specifically, as can be seen in Figs. 3 and 3A, Augustine et al. disclose a method of making a bandage, comprising: (a) forming a flexible dome including a side wall in a flexible film (cover 315), leaving said dome surrounded by a generally planar skirt extending outward from said dome; and (b) thereafter attaching said skirt adhesively to a skin contact layer of a flexible film (316) (col. 7, line 39-col. 8, lines13).

As regards claim 27, note col.7, lines-63-66.

As regards claim 28, note col. 8, lines 20-22, which discloses member (316) is a film layer and also note adhesive (328).

As regards claim 29, Augustine et al. disclose the claimed method including the step of attaching said dome base layer adhesively to said skin contact layer includes attaching a layer of transfer adhesive to said dome base layer and to a first side of said skin contact layer.

### ***Allowable Subject Matter***

Claims 31-39 are allowed.

**Conclusion**

The balance of the prior art disclose bandages or articles having dome shapes and low friction devices.
